AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:**Claims 1-23 (cancelled)**

24. (new) An isolated polynucleotide comprising:

- (a) a nucleotide sequence encoding a viral movement polypeptide, wherein the polypeptide has an amino acid sequence of at least 85% sequence identity, based on the Clustal method of alignment with multiple alignment default parameters of GAP PENALTY=10 and GAP LENGTH PENALTY=10, and pairwise alignment default parameters of KTUPLE=1, GAP PENALTY=3, WINDOW=5 and DIAGONALS SAVED=5, when compared to SEQ ID NO 6:, or
- (b) a complement of the nucleotide sequence, wherein the complement and the nucleotide sequence consist of the same number of nucleotides and are 100% complementary.

25. (new) The polynucleotide of Claim 24, wherein the amino acid sequence of the polypeptide has at least 90% sequence identity, based on the Clustal method of alignment with the default parameters, when compared to SEQ ID NO:6.

26. (new) The polynucleotide of Claim 24, wherein the amino acid sequence of the polypeptide has at least 95% sequence identity, based on the Clustal method of alignment with the default parameters, when compared to SEQ ID NO:6.

27. (new) The polynucleotide of Claim 24, wherein the amino acid sequence of the polypeptide comprises SEQ ID NO:6.

28. (new) The polynucleotide of Claim 24 wherein the nucleotide sequence comprises SEQ ID NO:5.

29. (new) A vector comprising the polynucleotide of Claim 24.

30. (new) A recombinant DNA construct comprising the polynucleotide of Claim 24 operably linked to at least one regulatory sequence.

31. (new) A method for transforming a cell, comprising transforming a cell with the polynucleotide of Claim 24.

32. (new) A cell comprising the recombinant DNA construct of Claim 30.

33. (new) A method for producing a plant comprising transforming a plant cell with the polynucleotide of Claim 24 and regenerating a plant from the transformed plant cell.

Application No.: 09/913,569
Docket No.: BB-1344

Page 8

- 34. (new) A plant comprising the recombinant DNA construct of Claim 30.
- 35. (new) A seed comprising the recombinant DNA construct of Claim 30.
- 36. (new) A method of altering the level of expression of a viral movement protein in a host cell comprising: (a) transforming a host cell with the recombinant DNA construct of Claim 30; and (b) growing the transformed host cell under conditions that are suitable for expression of the recombinant DNA construct wherein expression of the recombinant DNA construct results in production of altered levels of the viral movement protein in the transformed host cell.
